RESIDENT NOTIFICATION

DATE: March 20, 2025

RE: Crafton Borough - Steuben, Duncan, and Linden Sewer Separation

Dear Resident/ Property Owner,

Crafton Borough has contracted with Tedesco Construction Company to upgrade the storm sewer in your area.

The work will commence as soon as **Monday, March 31st at 7:00 am**. Working hours will be from 7:00 am to 5:00 pm Monday through Friday with Saturday work after approval by the Borough. **The street will be posted in advance for no parking as needed. The police will be contacted as required in the event vehicles are parked in posted areas.** In addition, note that PennDOT roads (West Steuben Street) will also be under construction, during which, flaggers will be posted for traffic control.

You will begin to see utility companies marking the streets, sidewalks and possibly installing marking flags on your property. Please do not remove or alter these marks for the duration of the project. In addition, property owners are encouraged to mark or contact us concerning privately owned underground facilities such as heated driveways, irrigation systems, or underground dog fencing. Tedesco Construction Company will not be responsible for repairing damage to underground utilities if we are not notified of their existence.

Please note that Borough Streets (Duncan, Maxwell, Linden) may be temporarily closed to traffic during working hours; however, emergency access and/ or resident access to individual properties will remain in place at all times during the work.

Should you have any questions regarding this notice or questions about the construction project in general, feel free to contact Tedesco Construction Company at the above number, or contact the site foreman, Ken Yosko, at 412-287-2779 or directly the Borough's engineer at 412-921-0752.

Thank you in advance for your patience and cooperation during the project.

Sincerely,

Tedesco Construction Company

412-751-7077
